

Nomenclatural novelties : Alexander B. Doweld

**Kryptastrinaceae** Doweld, fam.nov.

**IF550427**

Basidiocarps, hymenia, cystidia and hyphidia lacking. Hyphae very narrow. Basidia solitary, scattered, transversely 3-septate, each basidial cell develops one short, cornuted sterigma with asymmetrically attached spore. Basidiospores pyramidally tetrahedral, thin-walled.

Holotype: *Kryptastrina* Oberw. 1990.

**Kryptastrinales** Doweld, ord.nov.

**IF550428**

Basidiocarps, hymenia, cystidia and hyphidia lacking. Basidiospores pyramidally tetrahedral, thin-walled.

Holotype *Kryptastrina* F. Oberwinkler.
