

Nomenclatural novelties : Karl-Henrik Larsson

**Sceptrulum** K.H. Larss., in Karl-Henrik Larsson, gen.nov.

**IF550497**

Basidiomata resupinate, effused, thin, adnate to membranaceous. Hyphal system monomitic, all septa with clamps. Cystidia fusoid and more or less encrusted, or hyphoid with encrustations confined to the apex and to an inflation slightly below the apex. Basidia short, cylindrical to clavate or pedunculate, with four sterigmata and a basal clamp. Basidiospores elliptical to subcylindrical or slightly allantoid, thin-walled, smooth.

Holotype: *Peniophora inflata* Burt 1926.

**Sceptrulum inflatum** (Burt) K.H. Larss., in Karl-Henrik Larsson, comb.nov.

**IF550498**

Basionym: *Peniophora inflata* Burt, *Ann. Mo. bot. Gdn* **12**: 267 (1926) ['1925']
