

Nomenclatural novelties : Alexander B. Doweld

Cylindrochytridiaceae Doweld, fam.nov.

IF550351

Thallus monocentric, eucarpic. Zoosporangia stalked, cylindrical, apically operculate. Zoospores posteriorly uniflagellate, with a single lipid globule. Rhizoidal system extensive, branched with numerous catenulate spindle-shaped swellings, rhizoids arising from a single (basal) place on a cylindrical and stalked sporangium.

Holotype: *Cylindrochytridium* Karling 1941.
