

Nomenclatural novelties : Alexander B. Doweld

Catenochytridiaceae Doweld, fam.nov.

IF550353

Thalus monocentric, eucarpic; growth endo-exogenous. Zoosporangia operculate. Apophysis catenulate, compound. Zoospores posteriorly uniflagellate, with 2-3 lipid globules, fenestrae compact, single-tiered. Rhizoids strangulate, having a catenulate appearance, sparingly branched. Resting spores spherical, laevigate. Cellulolytic.

Holotype: *Catenochytridium* Berdan 1939.
