

Nomenclatural novelties : Alexander B. Doweld

Endogonomycetes Doweld, class.nov.

IF550357

Hyphae coenocytic; septa with median disciform cavities containing biconvex plugs. Sporangia unispored, borne on pseudophialides arising from globoid to elongate, septate or non-septate fertile branchlets (sporocladia). Zygosporangia globose to ovoid, most often formed in sporocarps; zygosporangia formed on apposed suspensors.

Holotype Endogone Link.
